General Meeting Information
College Township offers both in-person and virtual meeting attendance for all public meetings. To attend in-person, meetings will be held at 1481 E. College Avenue, State College PA, 16801, 2nd floor meeting room. To attend virtually, please see the information below.

To Attend the LIVE Meeting Via Zoom on Computer or Smart Phone:
- Click here to REGISTER for the meeting via Zoom. Once registered, you will receive a confirmation email containing information about joining the meeting.

To Attend the LIVE Meeting Via Phone:
- Dial: 1 (646) 558-8656 • Meeting ID: 831 4340 9172 • Passcode: 837718

*Click Here for detailed instructions on how to participate via zoom.

VIRTUAL PUBLIC COMMENTS: Please use the raised hand feature to participate. The moderator will recognize those with their hands raised (either by name or phone number).

WRITTEN PUBLIC COMMENTS: For specific Planning Commission agenda items and for items not on the agenda, written public comments may be submitted in advance by emailing smeyers@collegetownship.org by noon the day of the meeting.

CALL TO ORDER:

ZOOM MEETING PROTOCOL:

OPEN DISCUSSION (items NOT on the agenda):

CONSENT AGENDA: CA-1 January 3, 2023 Meeting Minutes (Approval)

PLANS: P-1 Arize Federal Credit Union Land Development Plan (Discuss/Action)
P-2 Mount Nittany Medical Center – Sketch Plan (Discuss)

OLD BUSINESS:

NEW BUSINESS: NB-1 Maxwell Development of Regional Impact (DRI) Report (Discuss/Action)

REPORTS:

STAFF INFORMATIVES:

OTHER MATTERS:

ANNOUNCEMENTS: Next meeting will be Tuesday, February 7, 2023 at 7:00pm

ADJOURNMENT:
CALL TO ORDER: Mr. Forziat called the meeting to order at 7:02 p.m.

ZOOM MEETING PROTOCOL: Mr. Forziat verified there were no people present via Zoom.

ROLL CALL: Mr. Forziat verified Mr. Hoffman was excused.

REORGANIZATION: Mr. Forziat turned the meeting over to be chaired by Mr. Franson for the reorganizational portion of the meeting.

Mr. Franson asked for nominations for the Chair.

Mr. Sharp moved to nominate Mr. Forziat for chair. Mr. Darrah seconded.

With no other nominations, Mr. Sharp moved to elect Mr. Forziat to the position of Chair of the College Township Planning Commission. Mr. Darrah seconded. Motion carried unanimously.

Mr. Franson turned the meeting back over to Mr. Forziat.

Mr. Forziat asked for nominations for the Vice Chair.

Ms. Ekdahl moved to nominate Mr. Sharp for vice chair. Mr. Darrah seconded.

Mr. Sharp moved to nominate Mr. Darrah for vice chair. Mr. Fenton seconded.

With no other nominations, Ms. Ekdahl moved to elect Mr. Sharp to the position of Vice Chair of the College Township Planning Commission. Mr. Darrah seconded. Motion did not carry with a vote of three to three.

Mr. Sharp moved to elect Mr. Darrah to the position of Vice Chair of the College Township Planning Commission. Mr. Fenton seconded. Motion did not carry with a vote of three to three.
Mr. Forziat recommended a revote for the position.

Ms. Ekdahl moved to elect Mr. Sharp to the position of Vice Chair of the College Township Planning Commission. Mr. Darrah seconded. Motion did not carry with a vote of two to four.

Mr. Sharp moved to elect Mr. Darrah to the position of Vice Chair of the College Township Planning Commission. Mr. Fenton seconded. Motion carried with a vote of four to two.

Mr. Forziat asked for nominations for the Secretary.

Mr. Darrah moved to nominate Ms. Ekdahl for secretary. Ms. Khoury seconded.

With no other nominations, Mr. Darrah moved to elect Ms. Ekdahl to the position of Secretary of the College Township Planning Commission. Ms. Khoury seconded. Motion carried unanimously.

Mr. Forziat asked for nominations for the Centre Regional Planning Commission (CRPC) representative.

Mr. Darrah moved to nominate Mr. Forziat for the CRPC representative. Mr. Sharp seconded.

With no other nominations, Mr. Darrah moved to elect Mr. Forziat to be the Centre Regional Planning Commission representative of the College Township Planning Commission. Mr. Sharp seconded. Motion carried unanimously.

Mr. Forziat asked for nominations for the CRPC representative alternate.

Mr. Darrah moved to nominate Mr. Fenton for the CRPC representative alternate. Ms. Khoury seconded.

With no other nominations, Mr. Darrah moved to elect Mr. Fenton to be the Centre Regional Planning Commission representative alternate. Ms. Khoury seconded. Motion carried unanimously.

Mr. Forziat asked for nominations for the College Township Council representative.

Mr. Forziat moved to nominate Mr. Hoffman to be the Council representative. Mr. Darrah seconded.

With no other nominations, Mr. Forziat moved to elect Mr. Hoffman to be the College Township Planning Commission representative to the College Township Council. Mr. Darrah seconded. Motion carried unanimously.

Mr. Forziat asked for nominations for the College Township Council representative alternate.

Mr. Sharp moved to nominate Ms. Khoury to be the Council representative alternate. Mr. Darrah seconded.

With no other nominations, Mr. Sharp moved to elect Ms. Khoury to be the College Township Planning Commission representative alternate to the College Township Council. Mr. Darrah seconded. Motion carried unanimously.

With no further reorganization needed the regular meeting of the College Township Planning Commission resumed as scheduled.

OPEN DISCUSSION: None presented.

CONSENT AGENDA:
Mr. Darrah moved to approve the December 6, 2022 meeting minutes as written. Mr. Sharp seconded. Motion carried unanimously.

PLANS: None presented
OLD BUSINESS:

OB-1 Annual Report – Final Draft
Ms. Schoch stated that staff took into consideration the comments made at the December 6, 2022 meeting and made some minor changes to the report as requested. Ms. Schoch stated once the report is approve by Planning Commission a date prior to March 2023 will be chosen to present the report to Council. She suggested the report was presented by the representative or alternate in prior years. Mr. Sharp opined there are no further changes necessary. Mr. Forziat stated he believes there are no further changes needed but would like to open the topic for discussion or comments. Mr. Darrah agreed he had no comments. With no further comments Mr. Forziat asked for a motion.

Mr. Sharp moved to accept the Planning Commission Annual Report as written for presentation to Council on a future date to be determined. Mr. Darrah seconded. Motion carried unanimously.

NEW BUSINESS: None presented.

REPORTS:

R-1 RFQ Review Committee Update
Ms. Schoch gave a brief update. Staff has prepared the scope of work for the contract, which was taken directly from the RFQ submission and added a few items. The scope has been presented to Council for comments. DPZ is also reviewing the scope to see if the initial cost estimate will change due to the modification of scope. Once Council, staff, and DPZ are in agreement, Council will be asked to approve the scope and contract at their upcoming meeting on January 19, 2023. Ms. Schoch continued that the scope has been broken down into seven sections including, overall goals, community engagement, project initiation, master plan and form-based code, adoption process, implementation, and final outcomes.

Mr. Darrah questioned the webpage discussion that took place during the Council meeting. Ms. Schoch explained that the discussion seemed to be about the interactive webpage that was presented during the interview process. She continued that the GIS Technician will help with the implementation process of the interactive webpage.

Mr. Sharp stated that the deliverables presented are impressive and opined that Council and the Township are getting a lot for what is being paid. Ms. Schoch stated that she is excited and happy with where staff is compared to where they were in the process last year at this time.

STAFF INFORMATIVES:

SI-1 Council Meeting Minutes
Mr. Darrah gave a brief update of the Council meeting that took place earlier in the day. There were minor changes to be made to the proposed by-laws for the IDA and the Watershed Commission. Changes suggested for the Watershed Commission by-laws will be presented to the other municipalities for their consent. Changes to the IDA by-laws will be sent to the IDA solicitor to make sure they are in compliance with the state. Mr. Sharp stated that Mr. Dustin Best will be the liaison for IDA and the Watershed Commission.

SI-2 Zoning Bulletin
Mr. Forziat stated that the zoning bulletins are excellent informatics provided by staff and he appreciates them being included in the packets. Mr. Forziat stated there was an article in the current bulletin about non-conforming use. Mr. Darrah stated he found that particular article to be quite interesting. Mr. Forziat stated if any Commissioners are in need of further explanation of any topics within the zoning bulletin to let him and/or staff know, and it can be added to a future agenda. Mr. Darrah brought up the Township’s current lawsuit and the recent successful outcome regarding fee-in-lieu. The commissioners further discussed the importance of perusing the provided zoning bulletins.
SI-3 EZP Report Update
No comments were made.

OTHER MATTERS: No other matter presented.

ANNOUNCEMENTS: Mr. Forziat announced the next meeting of the College Township Planning Commission will be Tuesday, January 17, 2023 at 7:00 p.m.

ADJOURNMENT: Mr. Darrah moved to adjourn the January 3, 2023 meeting of the College Township Planning Commission. Mr. Fenton seconded. Motion carried unanimously.

Meeting adjourned at 7:38 p.m.

**Draft**

Sharon E. Meyers
Senior Support Specialist – Engineering/Planning
LAND DEVELOPMENT PLAN NARRATIVE

Arize Federal Credit Union
December 19, 2022

Arize Federal Credit Union has a sales agreement with Stocker Chevrolet for Lot 3B of the Stocker Subdivision, Tax Parcel 19-2B-13. The property is a 6.446-acre parcel zoned C1, General Commercial, located at the northwest corner of the intersection of the Benner Pike and Ellis Place.

This plan overlaps with the Stocker Autobody Shop LDP proposed on Lot 3A directly behind this site. The land development plan for that parcel was conditional approved by the College Township Council on March 17, 2022. Numerous items were proposed on that land development which are also for the benefit of Lot 3B:

1. The stormwater management basins were designed to account for the buildout of both properties. Two of the basins are located on Lot 3B while a third basin is located on Lot 3A. An agreement for the shared use and maintenance of the stormwater management facilities will be executed between the property owners utilizing the basin. Refer to the stormwater management section of the narrative.

2. The Stocker Autobody Shop LDP proposes the extension of Premiere Drive to Ellis Place. Although no access is currently proposed onto the Premiere Drive extension with this plan, an area for a potential future driveway connection has been planned in case it is needed for the development of the remaining western proportion of the Arize site.

3. Improvements for Ellis Place are proposed on the Stocker Autobody Shop LDP including the area through Lot 3B.

4. The installation of the required sidewalk along the Benner Pike was deferred until Lot 3B is developed. The Arize plan design was then better able to incorporate the sidewalk more uniquely in the site design.

EXISTING AND PREVIOUSLY APPROVED CONDITIONS:
The private access, Ellis Place is located on the east side property and the proposed private extension of Premiere Drive is partially adjacent to a section of the northern property line. Previously approved Infiltration Basins B and C from the Stocker Autobody Shop LDP are located in the northwest corner of the parcel.

From the recent approved subdivision plan, a driveway access easement was proposed between Ellis Place and the Premiere Theatre Property. Sidewalks were also proposed along Ellis Place including the area along Lot 3B while sidewalks were deferred along the Benner Pike until the development of Lot 3B.

The building setbacks for the site are:
Front: 50 feet, (includes along Premiere Drive and Ellis Place frontages)
Side: 15 feet
Rear: 50 feet
Parking Setbacks are:
Front: 30 feet
Side: 10 feet
Rear 10 feet

The site is currently vacant except for an existing stormwater management basin that serves the adjacent Parcel 19-2B-13A. The basin is proposed to be removed per the Stocker Autobody Shop LDP and the Arize LDP. The required stormwater for that parcel has been incorporated into the Stocker LDP stormwater management basin design.

There are no existing structures on the lot.

PROPOSED:
STRUCTURE AND PARKING:
A two -story 11,280 S.F. building for financial offices and credit union branch is proposed on the site. 8,890 S.F. will be for office space and 2,389 S.F. for retail bank space. The customer entrance is located at the southeastern corner of the building. Three drive-thru lanes and one bypass lane are proposed on the north side of the building including one ATM lane.

A total of 43 parking stalls are proposed including 2 ADA accessible parking spaces. A loading area is located in the western side of the building out of the way of office and bank customers.

A screened dumpster is located northwest of the proposed building, sized large enough for a dumpster and recycling containers.

The proposed building coverage is 2.07%; the maximum allowed is 30%. The proposed impervious coverage is 19.97%; the maximum allowed is 70%.

SITE ACCESS:
Full vehicular access to the site will be off Ellis Place. Right-in / Right-out: only access is proposed at the Benner Pike. A traffic impact study is being submitted with this land development which shows no off-site required improvements including the Ellis Place / Benner Pike intersection. As noted previously, an area off of Premiere Drive has been planned for potential future driveway access for the undeveloped western area of the site.

PEDESTRIAN ACCESS:
Sidewalk access is proposed along the Benner Pike and Ellis Place in accordance with the previous Stocker plans. Access to the building is proposed from the sidewalk along Ellis Place. An accessible route sidewalk connection is also proposed to the right-in / right-out entrance at the Benner Pike. Sidewalk access is also proposed from the building to the dumpster enclosure and loading area.
UTILITIES:
Water: College Township Water Authority has an 8-inch public main that runs adjacent to Ellis Place within an existing 20-foot utility easement. A 6-inch tap and lateral is proposed off that main for combined domestic and the fire suppression system service in the building.

Sanitary Sewer: An existing UAJA public sanitary sewer main and easement is immediately adjacent to the western side property line. A new 6-inch lateral connection is proposed from that main, along the front setback area of the site and to the western side of the building.

Stormwater Management:
As noted previously, the stormwater management requirements for the property were included in the Stocker Autobody LDP design. Three infiltration basins were approved on Lots 3A and 3B to manage the stormwater run-off from the development. The existing stormwater basin located on both Lots 3A and 3B that manages the run-off from Tax Parcel 19-2B-13A is also being removed and the approved basins were designed based upon current regulations to manage the runoff from that property also. An agreement between the owners of Lots 3A and 3B will be executed to allow the installation of the basins on both lots and to address the maintenance of those basins.

Electric/Telecom:
Primary electric and telecom service is proposed from an existing West Penn Power pole located on the Benner Pike. The primary service will run to the proposed transformer pad and pedestals located northwest of the building near the dumpster enclosure. Secondary service will run from the transformer/pedestals to the utility room located at the north side of the proposed building.

A solar array is also proposed in the northern area the property. The array is designed to also provide electrical service for the building. The array is surrounded by a 6-foot-high privacy fence to screen the array from the adjacent driveways. A conduit is proposed from the array area to the same building utility room that the electrical service will be going to.

LANDSCAPING & LIGHTING
Landscaping:
Parking lots screening is proposed at all parking bays facing outward from the site. Trees are proposed at 1 per every 35 LF and shrubs at 15 per every 35 LF. Canopy trees are also proposed in parking islands. The landscaping and grading have also been designed to complement the proposed sidewalk running along the Benne Pike and Ellis Place adjacent to the parking areas.

Lighting:
The Arize development is designed with a combination of light fixtures, all being LED. Exterior pole-based fixtures of 20-feet and 25-feet heights are proposed around the perimeter of the parking areas and near the entrances. Building mounted lights are also proposed to complement the pole mounted lights to provide the required levels of illumination in the parking areas, sidewalks and at the building entrances. Separate canopy lighting with illuminate the drive-thru area to the required levels.
TRAFFIC:
A traffic impact study is being submitted for the development of the Arize Federal Credit Union facility and will be included under separate cover from the traffic engineer for the submission. The study found that no off-site improvements, turn lanes or traffic signals are required for the development.
ARIZE FEDERAL CREDIT UNION

Staging of Earthmoving Activities Construction Sequence

Earthmoving activities will commence after the completion of clearing and grading activities. Each stage will be completed before a subsequent stage is begun. These activities will take place in the order of GRID, GDM, GDF, and GF.

Temporary Construction Measures

Temporary seeding on all disturbed areas shall be done immediately after grading is completed and will consist of the following:

- Fine berm seeding mix
- 39-60% sand mix
- 30-34% grass seed mix
- 5-10% top soil

Permeable pavements shall not be used as temporary construction measures.

Flood Control

Flood control measures shall include the development of a flood control plan. The plan shall be submitted to the relevant authorities for approval.

Soil Materials

- All off-site materials are to be transported and unloaded at project site. The contractor is to provide the necessary equipment.

Rock Fill

The rock fill shall be in accordance with the project specifications. The rock fill shall be placed in layers, compacted, and sealed per the project specifications.

Recycling and Disposal of Materials

Recycling and disposal of materials shall be in accordance with the project specifications. Materials shall be recycled as much as possible. Disposal of materials shall be in accordance with the project specifications.

Maintenance Program

A maintenance program shall be developed for the project. The program shall include regular inspections, cleaning, and maintenance as required. The maintenance program shall be submitted to the relevant authorities for approval.

Permitting

All permits required by law shall be obtained prior to the start of construction. The contractor is responsible for obtaining all necessary permits.

In-Place Soils

In-place soils shall be tested in accordance with the project specifications. The results of the testing shall be submitted to the relevant authorities for approval.

General Construction Notes

1. All operations and personnel shall be in accordance with the project specifications. The contractor is responsible for ensuring that all operations and personnel are in compliance with the project specifications.

2. The contractor is responsible for the safety of all operations and personnel. The contractor shall ensure that all operations and personnel are in compliance with the project specifications.

3. The contractor shall ensure that all operations and personnel are in compliance with the project specifications.

4. The contractor is responsible for the safety of all operations and personnel. The contractor shall ensure that all operations and personnel are in compliance with the project specifications.

State College, PA 16801

RE: Sidewalk Deferral Waiver Request for the Arize Federal Credit Union Preliminary / Final Land Development Plan

Dear Council Members:

The Arize Federal Credit Union is proposing the development of the eastern portion of Lot 3B of the recently approved Stocker Subdivision at the intersection of the Benner Pike and Ellis Place.

As you recall, the sidewalk installation for Lot 3B along the Benner Pike for the Stocker Subdivision was deferred until the property is developed. If that was not deferred and the sidewalk was installed prior to the plan, the more interesting design layout shown on the Arize land development plans would not have been possible.

Considering the above, we are requesting a deferral of the remaining portion of the sidewalk along the Benner Pike, west of the proposed right-in/right-out entrance shown the Arize LDP until a land development plan of that portion of the property is submitted so that the sidewalk design can be more directly incorporated with the site design. The alternate would be to install a straight sidewalk in this area as required by the ordinance so as to be sure as to not impact the future site development.

On behalf of Arize Federal Credit Union, I am requesting a deferral waiver for western portion of the Benner Pike frontage from Chapter 180, Article V, Section 16.1. Sidewalks of the College Township Subdivision and Land Development Ordinance

I request your action on this item in conjunction with the Preliminary/Final Land Development Plan for the Arize Federal Credit Union. If you have any questions or need additional information, please contact me at (814) 231-8285, extension 310.

Sincerely,

Mark Torretti
Project Manager

MEMORANDUM

To: Mark Torretti, Penn Terra Engineering

From: Sharon Meyers, Sr. Support Specialist – Engineering/Planning

Re: Arize Federal Credit Union Preliminary/Final Land Development Plan, dated December 19, 2022 and last revised January 9, 2023

Date: Friday, January 13, 2023

Attached are comments from staff regarding the above-referenced preliminary/final land development plan: The revision of this plan, with comments addressed is due no later than Monday February 6, 2023 by noon. I will need five (5) full size paper sets, and a digital copy of the revised plan. Please email to smeyers@collegetownship.org.

The scheduled review before Planning Commission is Tuesday, January 17, 2023 at 7:00 pm.

The review before College Township Council is tentatively Thursday, February 2, 2023 at 7:00 pm.

Please note, the revision addressing the attached comments is not due until after the scheduled reviews with Planning Commission and Council, so that their comments may be addressed as well in the revision.

Should you have any questions, please do not hesitate to reach out.

Thank you.
MEMORANDUM

To: Penn Terra Engineering, Inc.
   Attn: Mark Toretti
   3075 Enterprise Drive - Suite 100
   State College, PA 16801

From: Lindsay K. Schoch, AICP | Principal Planner

Re: Arize Federal Credit Union Preliminary/Final Land Development Plan, last dated January 9, 2023

Date: January 13, 2023

As a result of your resubmission of the above referenced plan, please find below a list of comments from staff.

1. Show lot lines for Lots 3A, 3B, and 3C as recorded, including tax parcel ids. Provide deeds showing the subdivided lots recorded separately. The Township confirms the deeds are not recorded, once deeds are recorded, the plan must be updated.

2. The Stocker Auto Body Shop Preliminary/Final Land Development plan, which is referenced numerous times in the Plan, shall be recorded prior to the development of the Arize Federal Credit Union. Comment stands.

3. Chapter 180.16.1 sets forth specific criteria for the requests for deferrals of pedestrian facilities. Please review the attached Project Prioritization Matrix. As you see, Staff has scored this project with an 18. Contact staff with any questions. Comment remains until a decision is made by the PC and Council.

4. A deferral offers an option to delay construction of a required pedestrian facility for a set amount of time, or until some other factor triggers the need for construction. In order to request a deferral of a sidewalk, the following (4) shall apply: Comment remains until a decision is made by the PC and Council.
   a. Sidewalks are required under the SALDO;
   b. Justification is provided as to why the installation of pedestrian facilities may be a hardship at the time of initial land development;
   c. No alternatives are acceptable;
   d. Cost prohibitive formula is applied but the project is deemed not cost prohibitive;

5. In the case where a deferral is warranted, recommended by the Planning Commission and approved by Council, the following three shall apply: Comment remains until a decision is made by the PC and Council.
a. Unless otherwise recommended, a deferral shall not be more than two years;

b. Final conditions of deferral are determined by staff, recommended by the Planning Commission and approved by Council;

c. Notes outlining the final deferral conditions are added to the proposed land development/subdivision plan and recorded upon approval.

6. 200.11.A.(9).d.[2]: Ground-mounted solar energy systems shall be located at a distance equal to the building setbacks established by the zoning district the system is located in or a distance equal to one times the height of the solar energy system, whichever is greater. If the ground-mounted solar energy system is six feet in height or less and the total solar collector area is less than 144 square feet, the setbacks for the ground-mounted solar energy system may be reduced to five feet. When reevaluating the location of the solar panels please consider rooftop solar or covered parking areas. Staff commends you for the replacement of the solar panels and for coming into compliance with the ordinance. In regards to the vacant portion of the tax parcel, please note a 15’ setback is required off the solar panels, which may take up buildable area and make the lot unusable.

7. In regards to the solar panels, ensure all applicable sections of Chapter 200.11.A.9 are met, including by not limited to: location, height, setbacks, screening and visibility, battery storage, glare, and so on.

8. Chapter 170-10 Freestanding Signs (C)(2)(a) and (b). The placement of the sign, according to the sign officer, does not meet section b of this ordinance, kindly move the sign to be in compliance.

9. A shared access agreement for the potential future driveway access off Premier Drive will be required when construction is planned. Please add a note to the plan indicating such.

10. Continue to work with UAJA to ensure a lateral is extended if necessary.

Due to the nature of these comments presented herein, the Township reserves the right to make additional comments on future submissions.

Re: Arize Federal Credit Union Preliminary/Final Land Development Plan, dated December 19, 2022, Last revised January 9, 2023

Date: January 11, 2023

As a result of your submission of the above referenced plan, please find below a list of comments from staff.

Cover Sheet and Narrative and General Comments –

1. The Stocker Auto Body Shop Preliminary/Final Land Development plan, which is referenced numerous times in the Plan, shall be recorded prior to the development of the Arize Federal Credit Union.

   Response acknowledged. Comment stands. Note that the deed referenced does not correlate to a 6-acre parcel known as Lot 3B. Subdivision should precede recording of this plan. Inaccurate references should be removed and replaced by underscores for future population.

2. Several comments herein relate to the potential subdivision of Lot 3B, as referenced in Note 20, Sheet C3.

   Response acknowledged. Comment stands.

3. Provide a surety estimate for review and approval by Township Engineering department.

   Response acknowledged. Comment stands.

4. Provide verification NPDES amendment for this disturbance.

   Response acknowledged. Comment stands.

5. Provide verification of co-permittee status on the Stocker NPDES.

   Response acknowledged. Comment stands.

6. Provide evidence of PennDOT HOP approval.

   Response acknowledged. Comment stands.
7. Clarify the Solar Array installation. What is the height of the array? What is the surface below the array? If the surface below the array is compacted gravel, clarify how/whether this has been addressed in the total impervious calculation.

*Response acknowledged. Comment stands. The array geometry and ground surface material shall be indicated on the plan prior to further stormwater evaluation by the Township.*

8. Populate all references under Note 11 as applicable. Where a reference cannot be populated, provide underscores to signal that a reference must be recorded prior to the recording of this plan (note 16).

*Note 16, renumbered as Note 15, was neither populated nor were underscores added.*

9. The Stormwater Design Impervious Coverage chart contains a note, “As of the date of these plans, the impervious coverage indicated above for Lot 3B and all offsite properties has been fully utilized.”

Consider revision of this note, such as “As of the date of these plans, the impervious coverage indicated above for Lot 3A and all offsite properties has been fully allocated. Lot 3B proposes 1.2 acres impervious with this plan allowing for 3.30 acres additional impervious for further western development (see Note 20).”

*Response acknowledged. Comment stands. The array geometry and ground surface material shall be indicated on the plan prior to further stormwater evaluation by the Township.*

10. Engineer shall verify total impervious allocated to 3B with potential adjustment of solar field per Planner’s comments.

*Response acknowledged. Comment stands. The array geometry and ground surface material shall be indicated on the plan prior to further stormwater evaluation by the Township.*

11. *This comment has been satisfied.*

Sheet C4 –

12. *This comment has been satisfied.*

13. Provide draft language for proposed 20’ stormwater easements.

*Response acknowledged. Comment stands.*

Sheet C5 –

14. *This comment has been satisfied.*

Sheet C6 –

15. *This comment has been satisfied to the Township’s concern. Centre Region Code may hold additional jurisdiction.*

Sheet C11 –

16. *This comment has been satisfied.*

Sheet C13 –
17. Make application to CTWA and utilize materials and installation requirements as mandated by CTWA.

Response acknowledged.  Comment stands.

Sheet PC1 –

18. This comment has been satisfied.

Sheet ES1 –

19. This comment has been satisfied.

20. This comment has been satisfied.

Sheet ES3, Construction Sequence –

21. This comment has been satisfied.

Due to the nature of these comments presented herein, the Township reserves the right to make additional comments on future submissions

22. Numbering of Notes: This comment has been satisfied.
MEMORANDUM

To: Lindsay Schoch, AICP, Principal Planner
From: Amy J. Kerner, P.E., Public Works Director
Re: Arize Federal Credit Union
Date: January 13, 2023

I have received and reviewed the following:

From my review, I have the following comment(s):

1. The phone number listed on the Cover Sheet for CTWA is incorrect. Please revise. Satisfactorily addressed.

2. There is an existing tap in Benner Pike, approximately 240’ south (or west) of the property corner at Ellis Place for the lot being developed. It is designated as a “water valve” on the drawing. Although not mandatory, consideration can be given to utilizing it. It is understood that developer is considering using this tap; however, a final decision has not yet been made.

3. Sheet C3, Note 15 indicates that CTWA provided the hydrant flow rate. This note needs to be revised to include the date & time of the test and the following disclaimer: “College Township Water Authority does not guarantee nor warrant that this flow rate or residual pressure will be available at any given time or duration in the future”. Now Note 14. Comment is still outstanding.

4. Sheet C9. Several plants along the curved sidewalk between Ellis Place and Benner Pike appears to be planted directly over the existing 8” DIP waterline located within the easement area. They should be relocated. Satisfactorily addressed and noted that some of the plants are small ornamental grasses.

5. Sheet C13. The Water Lateral Detail indicates a trench width of 12” and a water service diameter of 6” which only leaves 3” on either side of the pipe. In accordance with the CTWA specifications and details, there needs to be a minimum of 6” on either side of the pipe and the detail should be revised accordingly. Satisfactorily addressed.

Approval of the plan is not recommended until the above comment has been satisfactorily addressed. Review of the required tapping fee, etc. will be conducted with the submission of an application for water service.
The Contractor shall verify and be responsible for all dimensions. DO NOT scale the drawing - any errors or omissions shall be reported to Stantec without delay.

The Copyrights to all designs and drawings are the property of Stantec. Reproduction or use for any purpose other than that authorized by Stantec is forbidden.
Project Summary

- Project includes 3 buildings:
  - 180 car garage
  - 10 story, 296K bed tower
  - Central utility plant
- Existing bed count= 238
- Proposed bed count= 243
- Also includes outpatient area and cafeteria
- Mid 2023 construction start
- Early 2026 construction end
MEMORANDUM

Thru: Adam Brumbaugh, Township Manager

From: Lindsay K. Schoch, AICP | Principal Planner

Re: Maxwell Development of Regional Impact Report

Date: January 12, 2023

On December 22, 2022, the Township received the Development of Regional Impact (DRI) Completeness Review and Recommendation for the Maxwell Rezoning in College Township prepared by Mr. Mark Boeckel, AICP, and Principal Planner for the Centre Regional Planning Agency (CRPA). As per the letter accompanying the DRI Report, the DRI application is deemed complete and now the Township has the opportunity to review the request and make comment.

The most efficient way to navigate the materials provided is to read the Report first, then the Centre Regional Planning Agency’s (CRPA) Response, and finally Staff’s response.

Attached with this memo you will find the following:

- Development of Regional Impact Report for the Proposed Rezoning of a Portion of Centre County Tax Parcel 19-004-78, 501 Struble Road, College Township to the General Industrial Zoning District for Maxwell Trucking and Excavating dated December 9, 2022 (prepared by Penn Terra Engineering, Inc.)
- December 22, 2022 Letter Regarding Development of Regional Impact Completeness Review and Recommendation – Maxwell Rezoning in College Township (prepared by Mr. Mark Boeckel, AICP)
- Township Staff response.

Next Steps:

- Planning Commission Review and consideration of support of the DRI (January 17, 2023)
- Council consideration of support of the DRI (February)
- Centre Regional Planning Commission review and recommendation
- Centre Regional Council of Governments General Forum recommendation
- Council to schedule a Public Hearing for the Rezoning
- Public Notification Process
- Public Hearing and Decision
Staff Recommendation: The Planning Commission review the materials and recommend to Council that they 1) approve the rezoning based upon the recommendations of the CRPA and COG General Forum; 2) set a public hearing; 3) approve the request to rezone the three (3) acre portion of tax parcel 19-004-078 from Forest to Industrial.
Development of Regional Impact Report
For the Proposed Rezoning of a Portion of Centre County Tax Parcel 19-004-078
501 Struble Road, College Township
to the General Industrial Zoning District

FRIDAY, DECEMBER 9, 2022
THE PROPOSAL

Maxwell Trucking and Excavating, or MTE, is a firm located at 455 Struble Road (Centre Co. Tax ID No. 19-004-78B) in College Township’s General Industrial Zoning District and within the Regional Growth Boundary and Sewer Service Area (RGB/SSA). Maxwell Trucking and Excavating (MTE) provides a variety of mechanical, excavation, demolition, renovation, paving, streetscaping, and utility installation and design services. MTE has projects ranging in size from $5,000 up to $3 million throughout Central Pennsylvania. MTE was established in 1989 and currently has 55 employees. They store a vast array of heavy equipment and inventory at their site on Struble Road.

As MTE has evolved, it requires more space to store its equipment and especially its inventory, both under roof and outside. Without a new storage building and parking area, Edward Maxwell, MTE’s owner, reports that they cannot fit in their current location. Unfortunately, there is no room to build a badly needed storage building or parking lot on their current parcel at 455 Struble Road (Centre Co. Tax ID No. 19-004-78B). Mr. Maxwell owns an adjacent 31.76-acre parcel at 501 Struble Road (Centre Co. Tax ID No. 19-004-78) that contains his family farmstead, which is no longer farmed. Mr. Maxwell would like to build a new storage building and parking lot on the closest possible portion of this adjacent parcel. However, 501 Struble Road lies in College Township’s Forest Zoning District, which does not permit industrial uses (see Appendix A for a list of permitted uses). Thus, Mr. Maxwell seeks to change this zoning on a roughly three-acre portion of the 31.76-acre parcel closest to his business to General Industrial so that he might build the storage building and parking there. The rezoning request is this size because of a power line easement that prohibits construction on a 50 ft. wide strip of 501 Struble Road closest to the business at 455 Struble Road. The power line is visible in the distance of the photograph to the left.

Figure 1: Looking northeast across the area to be rezoned from the southernmost corner.
The roughly three-acre portion of 501 Struble Road for which Mr. Maxwell seeks a zoning change, however, lies outside of the Regional Growth Boundary/Sewer Service Area (RGB/SSA). The border of the RGB/SSA runs between the two parcels at 455 and 501 Struble Road as shown in the following maps. Although Mr. Maxwell would accept the extension of public sewer service to the area proposed for rezoning, it is not necessary for the construction of a storage building and parking.

Figure 2: Location of rezoning request
Because College Township’s General Industrial Zoning District permits densities greater than one equivalent dwelling unit (EDU) per acre, however, Section V of the Centre Region Growth Boundary and Sewer Service Area Implementation Agreement presumes that the requested zoning change is a Development of Regional Impact (DRI). Thus, this DRI report is required prior to College Township’s consideration of the requested rezoning.

The storage building and parking will not have a “substantial impact upon the health, safety, or welfare of citizens in more than one Centre Region municipality,” and will not impact the University Area Joint Authority. Although it qualifies as a Development of Regional Impact, we believe that it qualifies for the “Limited Review Process” described at Section V, subpart 3 of the Centre Region Growth Boundary and Sewer Service Area Implementation Agreement.

Note that the roughly three-acre portion of Mr. Maxwell’s farmstead at 501 Struble Road that is proposed for a zoning change is surrounded on two sides by properties that are zoned General Industrial and lie within the RGB/SSA. The remainder of the Maxwell farmstead at 501 Struble Road lies on the third side. A roughly 125 ft. by 500 ft. strip of land is proposed to be left in College Township’s Forest Zoning District on the fourth side, serving as an extension of the existing strip and as a buffer between the new storage and the Mount Nittany Terrace residential neighborhood.

Daily construction, repair, and maintenance activities at Maxwell Trucking and Excavating require that all equipment and inventory be stored at the same business
location. Thus, building the new storage building and parking on another parcel in a distant location is not practically feasible. Likewise, a multi-story storage building on the 455 Struble Road property is not practically feasible due to the size and weight of the involved equipment.

When considering any rezoning, policy makers consider the impacts that the proposed project will have on its community. Even though all that MTE proposes here is a storage shed and a parking area, this report must also address any other activity permitted in College Township’s General Industrial Zone (see Appendix B). Because public sewer service is not proposed to be extended to the site, however, these activities could only be established there to the extent that their sewage could be treated on site. On September 21, 2022, Mr. Maxwell had the Centre Region Code Administration test eight locations on 501 Struble Road (Centre Co. Tax ID No. 19-004-78) for suitability to host an on lot septic system. Only two of these locations were found suitable for further percolation testing. Given that the existing house would need one of these two locations for a backup site, there is not a backup site available for a new septic system. This means that an additional on-lot septic system cannot be approved at 501 Struble Road. The site cannot treat any new sewage flows without the use of a spray system that would take up too much land.

So although College Township’s General Industrial Zone would allow any of the uses listed below, they could only be established within the proposed rezoning if they generate no sewage and can fit on three acres.

- “auto wrecking, junk and scrap establishments”
- “bulk storage of materials”
- “business services”
- “commercial parking lots”
- “commercial and fleet vehicle wash facilities”
- “construction equipment and vehicles, rental, sales, service and storage of”
- “data center”
- “freight handling equipment and vehicles, rental, sales, service and storage of”
- “industrial services”
- “manufacturing facilities”
- “mini storage/self-storage facilities”
- “motor vehicle fueling station”
- “motor vehicle maintenance/repair and storage”
- “office uses”
- “radio and television stations”
- “research, engineering and testing laboratories”
- “solar energy systems”
- “utility facilities”
- “vocational/technical schools”
- “warehousing, wholesaling, distribution and freight movement/handling facilities”
• “bulk storage of gas, petroleum, gasoline and other petroleum derivatives; explosives”
• “intensive manufacturing facilities”
• “power generation facilities”
• “nonindustrial uses by conditional use”

This report will consider the potential impacts of the proposed roughly 8,000 sqft. storage building and 10,000 sqft. parking lot. It will also consider the potential impacts of the above permitted uses to the extent that they could operate on three acres without generating sewage. This would eliminate from consideration any occupancies that generate waste, or that Section 2902.3 of the 2015 International Building Code requires to have toilet facilities – such as offices, retail, manufacturing, radio/television stations, laboratories, or schools. This requirement reduces the list of uses that could be established on this site down to storage, parking, junkyards, solar energy systems, or some utility facilities. Mr. Maxwell’s proposed storage building is exempted from this requirement only because it is a “parking garage” without attendants, or a structure “intended for quick transactions... having a public access area less than or equal to 300 square feet.” Employees will continue using the existing bathrooms in Maxwell’s offices, which are served by the University Area Joint Authority (UAJA) system. Only employees will occupy the proposed storage building, and then only briefly to place or retrieve inventory and vehicles.

Although Mr. Maxwell may subdivide the three acres proposed for rezoning into its own lot separate from 501 Struble Road (Centre Co. Tax ID No. 19-004-78), this report assumes that the thus created lot will not merge with his existing business parcel at 455 Struble Road (Centre Co. Tax ID No. 19-004-78B). It assumes that his business will stay in operation at 455 Struble Road. Together, this eliminates 455 Struble Road from considerations of potential future development and its implications. Furthermore, public sewer service cannot be extended under the Centre Region Growth Boundary and Sewer Service Area Implementation Agreement without the approval of the COG General Forum. Should Mr. Maxwell ever make such a request, he would have to submit a new DRI report. This report will not consider the possibility of requesting public sewer service.

For the sake of simplicity, the remainder of this report is organized around the list of questions that a DRI report is required to answer by Section V of the Centre Region Growth Boundary and Sewer Service Area Implementation Agreement (pages 4 and 5). Each question will be presented and then answered in the same order as in the agreement. As requested in a November 2, 2022, letter from the Centre Regional Planning Agency, only questions under “ii. Effect of the Development of Regional Impact on:” will be addressed.
**Questions from Section V of the Centre Region Growth Boundary and Sewer Service Area Implementation Agreement**

**ii.1. Effect of the Development of Regional Impact on the existing sewer collection, conveyance, and treatment system.**

An expansion of the public Sewer Service Area (SSA) is not proposed. The specifically proposed storage building and parking will not generate any sewage. Without an expansion of the SSA, none of the uses permitted in College Township’s General Industrial Zone, as listed above, could be served by the University Area Joint Authority (UAJA). Thus, there will be no impacts on the existing public sewer collection, conveyance, or treatment system in any scenario. Nevertheless, we have included as Appendix C a letter from the University Area Joint Authority, dated September 5, 2022, stating that their existing system could handle seven EDUs, which was the amount requested at the time.

**ii.2. Effect of the Development of Regional Impact on public water infrastructure.**

Mr. Maxwell does not propose that the new storage building be connected to public water infrastructure. Nevertheless, such a request could come in the future, from either Maxwell Trucking and Excavating or a different business or use. Without public sewer service and a new DRI, however, these activities would still be unable to generate sewage. This reduces the list of feasible, permitted uses down to storage, parking, junkyards, solar energy systems, or some utility facilities like a substation. None of these uses are significant users of water.

Appendix D is a letter from Amy J. Kerner, P.E., the College Township Public Works Director, explaining the College Township Water Authority’s abilities to provide water to this site.

**ii.3. Effect of the Development of Regional Impact on transportation network (including bicycle and pedestrian facilities).**

Mr. Maxwell estimates that MTE currently generates about 150 vehicle trips on an average business day. He anticipates that the proposed storage building and parking will generate little additional business or traffic. He states that the space is not needed because of business growth, but rather a change in the business’s activities that requires that more inventory be on hand.

Nevertheless, the requested rezoning would double the amount of land that MTE would have at that site. If we assumed that traffic generation was directly related to acreage, this would imply that an extra 150 vehicle trips would be generated on an average day for a total of 300 trips. This is
admittedly an aggressive estimate. Yet, we have no documentation that Struble Road couldn’t handle the extra 150 vehicle trips per day.

Without public sewer service and a new DRI, the other potential permitted activities that would be feasible in the three acres proposed for rezoning would be limited to storage, parking, junkyards, solar energy systems, or some utility facilities like a substation. None of these uses would generate as much traffic as MTE does.

College Township has not noted any concerns with Struble Road or its ability to handle additional traffic.

ii.4. Effect of the Development of Regional Impact on the public transportation system.

**Appendix E** is an e-mail from Gregory M. Kausch, the Senior Transportation Planner for the Centre Regional Planning Agency assigned to the Centre Area Transportation Authority, or CATA. In this e-mail, Greg explains that the nearest fixed route bus stop eastbound is about 1,300 ft. away, at the corner of Struble Road and East College Avenue. The nearest bus stop westbound is at 2601 East College Avenue. These two stops are served 43 times per weekday (46 times on Thursdays and Fridays) by the College Avenue Connector, and 3 times per weekday by the XB Route on its way to and from Bellefonte.

Because it largely works with motor vehicles, most of the traffic generated by MTE does not utilize CATA but rather drives there. As stated above, Mr. Maxwell anticipates that the proposed storage building and parking will generate little additional business or traffic. But if we assumed, again, that the CATA trips generated by MTE are directly related to its acreage, then the number of CATA trips could double due to this rezoning and project. Although this is an aggressive estimate, it does not result in a large amount of CATA usage.

Without public sewer service and a new DRI, the other potential permitted activities that would be feasible in the three acres proposed for rezoning would be limited to storage, parking, junkyards, solar energy systems, or some utility facilities like a substation. None of these uses would generate as much traffic as MTE.

ii.5. Effect of the Development of Regional Impact on emergency services (for example, fire, police, and ambulance service)

According to Mr. Maxwell, Maxwell Truck and Excavating has never made a call for fire, police, or ambulance services. He does not anticipate a noticeable increase in calls for police, fire, and ambulance services because of the new storage building. If we assumed, again, that the demand for police, fire, and ambulance services is directly related to acreage, then the demand could double due to this rezoning and project.

Without public sewer service and a new DRI, the other potential permitted activities that would be feasible in the 3 acres proposed for
rezoning would be limited to storage, parking, junkyards, solar energy systems, or some utility facilities like a substation. It is unlikely that any of these uses would generate as many police, fire, or ambulance calls as even MTE has.

Appendix F is a letter from Steven W. Bair, the Fire Director/Chief of Department, discussing the abilities of the Alpha Fire Company and Centre Region Emergency Management to serve the proposal. Appendix G is a letter from John F. Gardner, Chief of the State College Police Department (which provides policing to College Township), and Appendix H is a letter from Scott E. Rawson, Executive Director of Centre Lifelink EMS, each addressing the proposal. None of these organizations expressed significant concerns.

ii.6. Effect of the Development of Regional Impact on environmental features (such as soils, wetlands, streams, the aquifer, sinkholes, or similar environmental concerns)

Figure 4: Soils map.

The Centre County Natural Heritage Inventory, updated December 31, 2002, shows no biological diversity areas or natural heritage areas within 7,500 ft. of 501 Struble Road. Although a detailed field study has
not yet been undertaken, there are no known streams, steep slope areas, wetlands, floodplains, sinkholes, or unique natural features in the three acres of 501 Struble Road proposed for rezoning to General Industrial. Nevertheless, a few environmental concerns can be addressed. Over 75% of the three acres is prime agricultural soils, although none of the land is currently farmed. The two soil types found in the three acres (Murril Channery Silt Loam MuB and Murril Very Stony Silt Loam MvB) list as concerns slopes, erosion, and potential sinkholes (see soils map on the previous page). However, no sinkholes or wetlands have been observed on site (see photograph).

The site is similar to the adjacent property on which Maxwell Truck and Excavating currently exists (455 Struble Road, Tax ID No. 19-004-78B). College Township will require a land development plan to be submitted and approved that will address applicable environmental features.

ii.7. Effect of the Development of Regional Impact on school facilities.

Mr. Maxwell anticipates that the proposed storage building and parking will generate little additional business, traffic, or employment. They are instead needed to address business changes that require more inventory. As such, the parking lot and storage building are not likely to generate new students for the State College Area School District (SCASD). We could again assume that doubling the size of MTE in acreage could as much as double MTE’s effects on SCASD attendance. With only 55 current employees, however, the number of students generated by MTE is very small. Any increase would also be small.

Without public sewer service, and hence, a new DRI, the other potential permitted activities that would be feasible in the three acres proposed for rezoning would be limited to storage, parking, junkyards, solar energy systems, or some utility facilities like a substation. None of
these uses would generate as many new SCASD students as even MTE
does.

From July 1, 2022, through June 30, 2023, the State College Area
School District taxed the Forest District zoned former farm at 501 Struble
Road at a rate of $94.90 per acre. Meanwhile, SCASD taxed the General
Industrial zoned MTE business lot at 455 Struble Road at a rate of
$3,441.11 per acre. If we assume that the three acres of 501 Struble Road
that are requested to be rezoned General Industrial would then be taxed at
roughly the same rate as the already General Industrial 455 Struble Road,
then the three acres would provide $10,038.61 more in tax revenue for
SCASD annually than they currently do – assuming that tax rates do not
change. Relative to SCASD’s overall budget, this increase is minor but
nonetheless positive.

Appendix I is a letter from Mike Fisher, Director of Physical Plant at
the State College Area School District addressing its abilities and concerns
in providing services to the proposed rezoning.

ii.8. Effect of the Development of Regional Impact on adjacent land uses.

The roughly three-acre portion of Mr. Maxwell’s farmstead at 501
Struble Road that is proposed for a zoning change is surrounded on two
sides by properties that are zoned General Industrial and lie within the
RGB/SSA. The remainder of the Maxwell farmstead at 501 Struble Road lies
on the third side. A roughly 125 ft. by 500 ft. strip of land is proposed to be
left in College Township's Forest Zoning District on the fourth side, serving
as a buffer between the new storage and the Mount Nittany Terrace
residential neighborhood. Given this buffer and the surrounding uses, the
effect of the storage building and parking lot on adjacent land uses should be
minimal.

Without public sewer service, and hence, a new DRI, the other
potential permitted activities that would be feasible in the three acres
proposed for rezoning would be limited to storage, parking, junkyards, solar
energy systems, or some utility facilities like a substation. Some of these
facilities could negatively affect surrounding land uses, such as a junkyard.
However, the 125 ft. by 500 ft. strip of land left in the Forest District should
provide a substantial buffer between these uses and Mount Nittany Terrace.

iii. In addition to the above noted information, the host municipality may also
require information relative to fiscal impacts or specific details on transportation
impacts, environmental impacts, or similar studies.

To date, College Township has not requested any such studies.

iv. Economic analysis of the impact of the proposal on other areas of the community.
It is not anticipated that the proposed rezoning, storage building, or parking lot would have much of a noticeable economic impact on the Centre Region. The proposed storage building is merely intended to support the level of business activity that MTE has already achieved.

Nevertheless, the requested rezoning would have minor but positive tax revenue implications. From July 1, 2022, through June 30, 2023, the State College Area School District taxed the Forest District zoned former farm at 501 Struble Road at a rate of $94.90 per acre. Meanwhile, SCASD taxed the General Industrial zoned MTE business lot at 455 Struble Road at a rate of $3,441.11 per acre. If we assume that the three acres of 501 Struble Road that are requested to be rezoned General Industrial would then be taxed at roughly the same rate as the already General Industrial 455 Struble Road, then the three acres would provide $10,038.61 more in tax revenue for SCASD annually than they currently do – assuming that tax rates do not change. Meanwhile, in calendar year 2022, College Township taxed the Forest District zoned former farm at 501 Struble Road at a rate of $12.15 per acre. Meanwhile, the Township taxed the General Industrial zoned MTE business lot at 455 Struble Road at a rate of $440.48 per acre. If we assume that the three acres of 501 Struble Road that are requested to be rezoned General Industrial would then be taxed at roughly the same rate as the already General Industrial 455 Struble Road, then the three acres would provide $1,285 more in tax revenue for College Township annually than they currently do – assuming that tax rates do not change. Together, this would mean a total tax revenue increase of $11,323.61 annually.

v. Quality of life issues and the value the proposal would add to the community.

The proposed rezoning, storage building, and parking lot will not have much of a noticeable impact on the Centre Region’s quality of life, good or bad, beyond providing a modest increase in tax revenue and allowing a local business to sustain its economic growth and employment. The storage building and parking lot will be hidden from the nearest public right-of-way behind the 125 ft. wide Forest District wooded buffer. Mr. Maxwell’s specific proposal will not affect public infrastructure beyond possibly a few more vehicle trips, and should have little impact on neighboring properties or the environment. Given the sewage treatment limitations of the three acres proposed for rezoning, the other feasible activities permitted in College Township’s General Industrial Zone would not significantly add to or detract from the Centre Region’s quality of life either.

vi. The consistency of the proposal with the Centre Region Comprehensive Plan.

The community goals, objectives, and policies set by the 2013 Centre Region Comprehensive Plan understandably do not explicitly speak to a proposal as small as the one presented here. Policy 3.2.1. on page 21 does "Encourage the clustering of industrial land uses in locations with
appropriate infrastructure.” The requested rezoning would allow Maxwell Trucking and Excavating to grow in place in an industrial area with the necessary infrastructure. However, Policy 3.2.1 lies underneath Objective 3.2, which says “Locate the majority of industrial development within the Regional Growth Boundary in accordance with sound land planning principles and the needs of industry.” Furthermore, the Centre Region Comprehensive Plan’s future land use map shows the area of the requested rezoning as “Forest.” This is understandable, given that back in 2013, nobody knew what changes would happen to MTE or its business environment.

**Summary**

To build a badly needed 8,000 sqft. storage building and 10,000 sqft. parking lot, Maxwell Trucking and Excavating (MTE) has requested that three acres of an adjacent 31.76-acre former farm addressed as 501 Struble Road (Tax ID No. 19-4-78) be rezoned from College Township’s Forest District to its General Industrial District. Normally, changing land from a restrictive conservation zone (like the Forest District) to a permissive industrial zone (like the General Industrial District) could have substantial impacts. The Forest District permits nothing more intensive than single family detached homes on two-acre lots, open space, forestry, agriculture, and correctional facilities. Meanwhile, the General Industrial District permits manufacturing, wholesaling, gas stations, offices, and power generation. Replacing many of the Forest District activities with a General Industrial District activity could significantly increase demand for sewage treatment, water, transportation, transit, and emergency services. It could impact the environment, schools, neighboring lands, and the regional economy.

However, the request to rezone the three acres of 501 Struble Road from the Forest District to the General Industrial District does not involve a request to extend public sewer service. There are not enough acceptable septic system sites on the parcel. Without a request to extend public sewer service and a new DRI, any activity on the three acres could not generate any sewage. In this unique instance, laws and ordinances governing sewage treatment override the permissive nature of industrial zoning. What can be done with the three acres is greatly limited, as are the potential impacts on the community. The potential uses shrink down to merely storage, parking, junkyards, solar energy systems, or some utility facilities like a substation.

Without generating any sewage, the potential General Industrial District uses for the three acres would have no impact on the University Area Joint Authority (without a new DRI), and very little impact on the College Township Water Authority, traffic on Struble Road, the Centre Area Transportation Authority, the Alpha Fire Company, Centre Region Emergency Management, the State College Borough Police Department, Centre Lifelink, the State College Area School District, the environment, neighboring lands, or the regional economy. The specific storage shed and parking proposed by Maxwell Trucking and Excavating would also have
little impact beyond providing a modest increase in tax revenue and allowing a local business to sustain its economic growth and employment.

APPENDIX C: UNIVERSITY AREA JOINT AUTHORITY (UAJA)

September 5, 2022

Maxwell Trucking and Excavating
455 Struble Rd
State College Pa, 16801

RE: Intent to Serve (501 Struble Rd)

Dear Maxwell Trucking,

The University Area Joint Authority has available capacity in both the conveyance system and treatment facility for the 7 EDU’s for the 501 Struble Rd property. There are no current overloads, and none are projected in the next 5 years. It is also our understanding that all sanitary sewer flow from this project is to be directed into the Authority’s conveyance system. The purpose of this letter is to solely confirm available system capacity.

For UAJA to serve the property, the Centre Region’s Act 537 Plan Sewer Service Area will need to be expanded. Should the Centre Region plan be revised, a post card exemption or planning response is still required.

If you need additional information or have any questions, please contact our office.

Thank you,

Cory R. Miller
Executive Director

RE: Maxwell Trucking & Excavating, Inc.
Development of Regional Impact

Dear Mr. Slusser:

In response to your email dated November 9, 2022 requesting College Township Water Authority’s (CTWA) ability to serve the three (3) acres in question for the proposed rezoning to General Industrial. Additionally, your email of November 11, 2022 clarified that use of the potential septic field behind the farmhouse should not be considered and that potential development will be limited by no public sewer service.

CTWA has the capacity to serve the potential future development being contemplated; however, some system pressure modifications may be required based on final design elevations.

Sincerely,

Amy J. Kerner, P.E.
Public Works Director

Meyers" <smeyers@college township.org>

Lee:

Thank you for allowing the Centre Area Transportation Authority (CATA) the opportunity to review and provide comment on the Development of Regional Impact (DRI) application referenced in the subject line above.

At this time, CATA will have no formal comment to offer. This is based upon the anticipated use of the site, the maximum number of employees, and the proximity of CATA services to the site.

To answer your other questions, the closest CATA fixed route stops are East College Avenue at Struble Road in the eastbound direction, and 2501 East College Avenue in the westbound direction. These stops are served 43 times per day most weekdays by the College Avenue Connector (46 times per day Thursdays and Fridays during full service only, and some Saturday and Sunday service applies), and 3 times per day weekdays by the XB route.

Please don’t hesitate to contact me directly if you have any further questions or concerns.

Thanks!

Greg

RE: Maxwell Trucking and Excavating proposed Rezoning

Dear Lee:

I have reviewed the proposed rezoning from a fire department and emergency management standpoint. Although this specific project does not involve an expansion of public sewer service, it is possible that such an extension could be sought in the future. I have considered this eventuality in my review.

This property is readily accessible and there are municipal fire hydrants proximate to the site. None of the approved uses within the General Industrial Zone are likely to create an undue burden on the fire department nor the region’s emergency management program. Similarly, none of the approved uses would be likely to create uniquely dangerous conditions should a fire or HazMat incident occur at this location. This assessment is based solely on potential impact related to emergency response. No consideration is being made regarding potential quality of life impact on the surrounding area, as this is beyond the scope of fire and emergency services.

If you need any additional information regarding my review, please do not hesitate to contact me.

Best Regards,

Steven W. Bair
Fire Director/Chief of Department

Serving the Townships of College, Ferguson, Patton, the Borough of State College, and Penn State University.

RE: Maxwell Trucking & Excavating Rezoning Impact Memo  
Date: December 7, 2022

The State College Area School District has reviewed the proposed rezoning request and anticipates no adverse impacts to the School District as a result of the change in zoning on the subject parcel located at 501 Struble Road (Centre County Tax ID No. 19-004-78) from the Forest District to General Industrial District in College Township.
Development of Regional Impact Completeness Review and Recommendation – Maxwell Rezoning in College Township

Prepared by:
Mark Boeckel, AICP
Principal Planner
Centre Regional Planning Agency
December 22, 2022

Lindsay Schoch, AICP
Principal Planner
College Township
1481 E College Avenue
State College, PA 16801

RE: DEVELOPMENT OF REGIONAL IMPACTS COMPLETENESS REVIEW AND RECOMMENDATION – MAXWELL REZONING IN COLLEGE TOWNSHIP

Dear Lindsay:

On December 9, 2022, the Centre Regional Planning Agency (CRPA) received a revised Development of Regional Impact (DRI) application which proposes the rezoning of a three-acre portion of a 31.76-acre parcel (tax parcel number 19-4-78) in College Township from Forest to General Industrial. A previously submitted DRI report was deemed incomplete. The report indicates that this rezoning will facilitate the construction of a storage building and parking area for the applicant’s existing business, which is located on an adjacent parcel.

In accordance with Section V.2.b of the 2013 Centre Region Growth Boundary and Implementation Agreement, hereafter referred to as Implementation Agreement, the CRPA conducted a completeness review of the Maxwell Trucking and Excavating Development of Regional Impact (DRI) Report. Based upon the application requirements within the Implementation Agreement that pertain to proposed rezonings outside of the Regional Growth Boundary and Sewer Service Area, this DRI application is deemed complete.

CRPA Recommendation

In accordance with Section V.2.b of the Implementation Agreement, the CRPA is also required to provide a recommendation to the host municipality regarding the DRI request within 15 days of the application being deemed complete. The CRPA provides the following comments for the Township’s consideration:

1. The last paragraph on Page 3 states that the applicant believes that the request should qualify for the “Limited Review Process” stated in Section V, subsection 3 of the Implementation Agreement. Per that section of the Implementation Agreement, only proposed expansions to the Regional Growth Boundary (RGB) and Sewer Service Area (SSA) can qualify for the Limited Review Process. Where the proposed DRI does not propose the extension of RGB and SSA, the COG General Forum will only need to provide comments to College Township prior to final action on the proposed rezoning.
2. The DRI report concludes that the proposed rezoning would not have any negative impacts to service providers within the Region or to surrounding uses.

3. The Pennsylvania Municipalities Planning Code states that “Zoning ordinances adopted by municipalities shall be generally consistent with the municipal or multi-municipal comprehensive plan or, where none exists, with the municipal statement of community development objectives and the county comprehensive plan. If a municipality amends its zoning ordinance in a manner not generally consistent with its comprehensive plan, it shall concurrently amend its comprehensive plan in accordance with Article III.”

The 2013 Centre Region Comprehensive Plan identifies the future use of this land as “Forest”, which is defined as “land uses that include public or private areas that are primarily in timber. This category may also include commercial timber or pulpwood harvesting.” The area to be rezoned is located adjacent to an area with an Industrial future land use category. Forestry activities are a permitted use in all districts there is per the MPC, however it is unlikely that this property will remain vacant or be utilized for forestry activities as a result of this rezoning.

4. In 2004, College Township entered into an intermunicipal zoning agreement with Patton Township to cooperatively plan for industrial and multi-family residential land uses. The provisions of this agreement should be followed as they related to proposed changes to district boundaries or regulations.

5. As noted within the DRI report, many of the uses within the General Industrial zoning district could not be established without public sewer service. Without sewer service, the use of the area for which rezoning is requested would be very limited. Sewer service is not being requested at this time, however, rezoning a portion of this property to General Industrial could result in a future request for an expansion of the Regional Growth Boundary and Sewer Service Area. Since many General Industrial uses require public sewer service, the Township should consider if this area would be appropriate for higher density development in the future.

The requested rezoning involves a minimal change to the district boundaries and given the limited uses that could be established without public sewer service, the CRPA agrees with the general conclusions of the DRI Report.

While the rezoning will not prohibit the future land use identified within Centre Region Comprehensive Plan, the requested change will likely result in industrial development on a portion of a property that is currently zoned for rural uses. Since this change is being considered as a result of the property owner’s request, the Township should establish findings to support the proposed rezoning to ensure that it’s approval would not establish a precedent for similar requests in the future. The Township should also consider establishing specific policies related to future expansion of the Industrial District within the next iteration of the Centre Region Comprehensive Plan.
Next Steps

Per the Implementation Agreement, the host municipality can begin its review of a DRI request once it has been deemed complete and a recommendation has been provided by the CRPA. There are no specific requirements related to the municipal review of a DRI request, either in terms of timeframe or scope.

If College Township determines that the requested rezoning has merit following its review of the completed DRI report, the DRI application must be forwarded back to the CRPA for regional discussion. The Township should include findings of fact related to its support of the request.

Once the DRI application and Township findings have been received by the CRPA, the request will be reviewed by the Centre Regional Planning Commission (CRPC) at its first available meeting. Following a review by the CRPC, the DRI will be forwarded to the COG General Forum for review. Rezoning requests are reviewed by the General Forum with an opportunity to provide comments, but the final authority for zoning decisions remain with the host municipality.

Once the General Forum has concluded its review of the proposed DRI and provided comments back to the host municipality for consideration, the Township can proceed with holding a public hearing to consider adoption of the requested rezoning.

If you have any questions regarding this review, its recommendations, or the DRI process, please contact me at your earliest convenience.

Regards,

Mark Boeckel

Re: Township Staff Response to the CRPA Letter and the Maxwell DRI Report

Date: January 12, 2023

To correspond with the two earlier reports, the following is staff’s response to both the DRI Report and to Mr. Boeckel’s Completeness Review letter.

Development of Regional Impact Report for the Proposed Rezoning of a Portion of Centre County Tax Parcel 19-004-78, 501 Struble Road, College Township to the General Industrial Zoning District for Maxwell Trucking and Excavating dated December 9, 2022 (prepared by Penn Terra Engineering, Inc.):

The Proposal (Starting on page 2 of 23):

Maxwell Trucking and Excavating (MTE) is requesting a zoning change. Mr. Maxwell proposes to rezone approximately three (3) of thirty-one (31) acres from its existing zoning designation of Forest to the adjacent land zoning designation of Industrial. The purpose of this rezoning and related pertain to a proposed roughly 8,000 square foot storage building and 10,000 square foot parking lot.

Mr. Maxwell reports that MTE is outgrowing their current location, therefore need more space to expand the business. (Staff questions the approximately 19 total acres owned by Mr. Maxwell located on and around East Trout Road/Shiloh. What is being done at the Shiloh Road business office/property where equipment is currently being housed)?

A roughly 125’ by 500’ strip of land is proposed to remain Forest on the side of the parcel fronting Struble Road to act as a buffer between the newly proposed storage area and the Mount Nittany Terrace residential neighborhood. This is one of the positive outcomes of the rezoning, the fact a buffer remains. A precedent was set by a similar buffer just across the street with a rezoning that preserved a strip of residential land to protect the residents from the uses in the adjacent zoning district, in this case, industrial.
At times, when development on a parcel becomes difficult, the option to “go up” should be considered. In the case of MTE, “going up” is not an option, as the machines and equipment he stores are far too heavy for a second story to support.

The report considers the permitted uses in the Industrial zoning district and the extent to which they could operate on three acres (amount requested) without generating sewage. Research into the International Building Code (IBC) was completed to show requirements for bathrooms. Those IBC regulations dropped the list of permitted uses able to be established on the lot to a few: storage, parking, junkyards, solar energy systems, or some utility facilities. Staff agrees with this statement. These uses are noted later in the document, and to sum it up, staff is in agreement with the majority of the responses below.

The report stresses, should Mr. Maxwell wish to extend sewer service for future potential development, he would have to submit a new DRI report, which would require approval from five out of the six participating municipalities in the Centre Region.

**Required Responses to Section V of the Centre Region Growth Boundary and Sewer Service Area Implementation Agreement:**

Impact on Existing Sewer Collection, Conveyance, and treatment system: Staff is satisfied with the Intent to Serve letter from the University Area Joint Authority (UAJA) indicating capacity exists in the system for this potential rezoning. One question arose, does UAJA consider the SSA/RGB when preparing the Letters of Intent to Serve?

Impact on Public Water Infrastructure: Staff is satisfied with the letter from the College Township Water Authority indicating the Authority has the capacity to serve the potential future development being contemplated; however, some system pressure modifications may be required based on final design.

Impact on the Transportation Network: Staff discussed the proposal with the township’s consulting traffic engineer. He felt the DRI request is only for additional parking and inventory storage, and doesn’t foresee counts needed; unless there is some existing traffic concern or if Struble Road needs maintenance and more truck traffic will deteriorate the road or service life. Mr. Maxwell should provide more information concerning additional truck traffic and proposed type of additional inventory/storage for the record.

Impact on the Regional Public Transportation System: Staff is satisfied with Mr. Kausch’s response that indicated anticipated use of the site, the maximum number of employees, and the proximity of CATA services to the site; he will have no formal comments.

Impact on Emergency Services: Staff is satisfied with the letter from Centre Life Link EMS indicating they do not anticipate the rezoning having an impact on Centre Life Link EMS. As well as the similar letters provided by the Regional Fire Director and the Chief of the State College Borough Police Department deeming no impacts.

Impact on Environmental Features: The property, as found in the DRI report does have prime agricultural soils, but the property is not currently being farmed. Staff is pleased no wetlands, floodplain areas or sinkholes are present on the property.
Impact on School Facilities: Albeit not a significant impact, the rezoning and changing the Forest land to Industrial land will provide a $10,000 increase in school district taxes. Staff feels the letter from the Director of the Physical Plant is sufficient. Please note it is a requirement of the Municipalities Planning Code to report new residential development to the local school district at the end of each development plan recording, but reporting other uses outside of residential do not require school district notification and therefore staff doesn’t feel this expansion would make an impact on the school district’s facilities.

Impact on Adjacent Land Uses: at the current time, the adjacent land uses are consistent with that of what is proposed and consistency would continue in the future if any of the uses stated throughout the DRI report are established. Another positive is the 125’ by 500’ buffer for the residential area across Struble Road.

The DRI Report also informs that the township can require further information such as fiscal impacts or specific details on transportation impact, environmental impacts, or similar studies.

Economic Analysis of the Impact of the proposal: Staff is in agreement with the statement within the report noting the storage building and parking lot would not have a noticeable economic impact on the Centre Region.

Impact on the Quality of Life: Staff is in agreement with the report regarding allowing a local business to sustain its economic growth and employment. Otherwise the proposal does not impact the quality of life in the Region.

Consistency with the Comprehensive Plan: The fact is the Future Land Use Map designates this property as Forest. Typically, if something is not consistent with the Future Land Use Map, the rezoning should not be recommended. In this case, the Comprehensive Plan does encourage the reuse, redevelopment, or revitalization of underutilized properties in the region and identifies industrial sites specifically, noting existing barriers to revitalization efforts identified, as well as collaborating opportunities for incentives, site improvements, and other methods of encouraging redevelopment.

1. Township staff agrees that the proposed DRI does not propose the extension of the Regional Growth Boundary / Sewer Service Area (RGB/SSA), therefore the project does not fall under the “Limited Review Process” set forth in the Centre Region Growth Boundary and Implementation Agreement, hereafter referred to as Implementation Agreement.

2. Regarding negative impacts, the report concludes the proposed rezoning would not have any negative impacts to service providers within the Region or to surrounding uses.

3. The Township acknowledges if the rezoning is approved, changing a Forest zoned property to an Industrial zoned property, which would not be consistent with the existing
Regional Comprehensive Plan’s Future Land Use map, the Township will work with CRPA to ensure the zoning and comprehensive plan are consistent.

4. The Township works closely with Patton Township when an industrial or multi-family zoning change is proposed to ensure compliance with the 2005 Inter-municipal Zoning Agreement, which allows for the industrial and multifamily uses across municipal boundaries. According to the Agreement, specifically Section X: Monitoring and Reporting Requirements, the Townships are required to report annually, any plans including industrial use plan reviews; description of any rezoning requests; and information on any changes to zoning districts related to multi-family residential or industrial. In the case of an approved rezoning, the Township shall notify Patton Township and abide by the requirements set forth in the Agreement.

5. Is this area suitable for future, high-density development? The answer is no, due to poor soil suitability.

6. The Forest District’s Intent encourages the preservation of woodlands as a most suitable use in rural areas; alleviating erosion and sedimentation and flooding; to protect wildlife habitat; and to provide for aesthetic relief, open space and recreational uses.

As one stands and looks toward the Maxwell site from the north side of College Avenue, you can see the growth boundary line by the limited amount of homes and businesses at a certain point, going up the side of Mount Nittany. This is subjectively the purpose of the RGS/SSA. Our region is unique in the fact we have a regional growth boundary, it can be a very useful tool when determining where future growth and development occur. Allowing an intensive use to encroach up the sides Mount Nittany could be detrimental and could set a precedent. Anytime the opportunity to expand the Regional Growth Boundary/Sewer Service Area is on the table, we take a chance in setting a strong precedent for the expansion requests to continue, especially if the request is successful. In this particular case, the development is slowly creeping up the side of Mount Nittany.

After much thought and consideration, staff recommends the Planning Commission make a recommendation to Council to approve the DRI Application and to set a Public Hearing after the DRI is heard by CRPC and the COG General Forum, and in-turn, the rezoning. Staff finds the rezoning acceptable for a few reasons, which include fact that the soil is undesirable and building something denser without expanding the sewer service is nearly impossible from a sewage planning standpoint; the most reasonable/least intrusive request was made (3 acres) rather than request the entire lot rezoned; the intent to preserve what is existing beyond the three acres is present and a 125’ by 500’ buffer exists to buffer the residential zoning from the industrial zoning.

Over the time staff was reviewing this report, the following conditions came to mind and are included here for future consideration as we move forward with the process.

**Considerations for a Rezoning:**

⇒ As a result of this change, create a Ridge Overlay?
⇒ Allow the rezoning by conditional use and amending the ordinance in such a way to catch other rezoning requests that want to encroach into other rural districts. E.g. Forest and Agriculture.

⇒ The zoning district boundary change as a result of the rezoning shall remain the same for approximately 20 years and shall not further encroach into the forest district.

⇒ If the use intensifies over the 20 allotted years and the use ultimately requests the extension of the public sewer system/sewer service area (SSA), a new Development of Regional Impact application shall be submitted for review and approval.

⇒ When the use is no longer, the property shall be restored to the way it was in January of 2023; free of debris and machines/equipment.

⇒ Consider adding Fencing and Screen requires beyond what is required in the underlying zoning district.

⇒ What about a bathroom facility, a porta-john or privy on site?

⇒ The public access area shall be less than 300 square feet. This is per the standards set forth in the building code as noted on page 6 of 23 in the DRI Report.

⇒ The Conditional Use will be “expansions of the regional growth boundary” and since this is a conditional use, the planning commission and council will have the opportunity to tailor the conditions to each use.

⇒ Relocate Shiloh equipment to Struble location.
