Maintenance Program
- Post treatment maintenance is important to minimize the risk of resurgence. Maintenance is recommended every 2-3 years, depending on the climate and the type of vegetation.

Staging of Earthmoving Activities Construction Sequence
- The city will continue to follow the established staging of earthmoving activities. Each stage will be completed before the next stage starts.

General Construction Notes
- All general permits and permits will be on site. The construction schedule for earthmoving activities will be submitted for approval.

Pumped Water Filter Bag
- For areas of earthmoving activities, the bag will be installed on site, and the filter will be used to remove any material that may cause clogging.

Spill Materials
- Spill materials will be removed from the site and placed in accordance with the spill response plan. Spill response plans will be submitted for approval.

Recycling and Disposal of Materials
- Recycling and disposal of materials will be performed in accordance with local and state regulations. Materials will be recycled to the extent possible.

Responsibilities for FI Materials
- Responsibility for the recycling and disposal of materials will be determined by the project manager. Materials will be recycled to the extent possible.
