Subject: Resident Inquiry

To whom it may concern,
I have just read in the Centre Daily Times about a casino being installed at the Macy's location in the Nittany Mall. As a resident of College Township and life long resident of State College, I ask you take into consideration the wants and needs of your constituents. While this may bring a short term windfall of cash and taxes the long term effect is detrimental to the residents. From many conversations I have had with residents in the township, if this does actually happen, many are concerned about how our home values will be negatively affected. Casinos in small college towns dont exist. This is not a amenity anyone wants or needs, so I am curious to.....why? Please contact me if you have any questions as I will definitely be putting information out for the residents of College Township to send their concerns about this detrimental impact on us.
