Revising and Disposal of Materials

The operator shall derive all the rights, titles, and interest in disposal of all property and water rights to the Department's best knowledge, management, or control of the Department. The operator shall be responsible for disposing of all miscellaneous waste materials disposed of by the Department, including, but not limited to, any materials generated during the construction of the project and any other materials generated by the Department. Any materials generated by the Department shall be disposed of in accordance with all applicable laws, regulations, and guidelines, including, but not limited to, any applicable federal, state, and local laws and regulations.

Responsibilities for Fill Materials

The contractor is responsible to use environmentally friendly disposal options and to minimize any fill material required to be imported or exported from the site. The operator shall be responsible for all materials delivered to the site, including, but not limited to, all fill materials, soil, sand, gravel, and other materials. The operator shall be responsible for obtaining all necessary permits and approvals for the disposal of fill materials, including, but not limited to, any applicable state and federal permits. The operator shall be responsible for providing all necessary equipment and personnel for the disposal of fill materials, including, but not limited to, any necessary excavation, fill, and compaction equipment and personnel. The operator shall be responsible for providing all necessary materials and supplies for the disposal of fill materials, including, but not limited to, any necessary fill materials, soil, sand, gravel, and other materials.
