SURVEY FEATURES LEGEND

PROPOSED FEATURES LEGEND

NOTES:

SPOT ELEVATIONS AS SHOWN ARE FINAL PAVEMENT GRADES AFTER OVERLAY. INFORMATION IN PARENTHESES ( ) IS THE DIFFERENCE IN FINAL GRADE AND EXISTING GRADE.
2. At least 7 days prior to starting any earthwork activities, including clearing and grading, the sewer installation, or the construction of any structures, or any other work involving the movement of earth or materials, the permit holder shall submit an application to the Pennsylvania Department of Environmental Protection (DEP) for a wetlands permit. The DEP will review the application and determine whether the proposed activities will impact a wetland.

3. At least 30 days prior to starting any earthwork activities, including clearing and grading, the sewer installation, or the construction of any structures, or any other work involving the movement of earth or materials, the permit holder shall submit an application to the Pennsylvania Department of Environmental Protection (DEP) for a wetlands permit. The DEP will review the application and determine whether the proposed activities will impact a wetland.

4. An earthwork activities plan must be submitted to the DEP, including a description of the proposed activities, the proposed schedule, and any anticipated impacts to the environment. The DEP will review the plan and determine whether it meets the requirements of the state's wetlands regulations.

5. The permit holder must submit an environmental impact statement (EIS) to the DEP, describing the proposed activities, the potential impacts to the environment, and any proposed mitigations. The DEP will review the EIS and determine whether the proposed activities are consistent with the state's wetlands regulations.

6. If the proposed activities are determined to have a significant environmental impact, the permit holder must submit a plan for mitigation to the DEP, including a description of the proposed mitigation measures, the expected costs, and the expected effectiveness. The DEP will review the plan and determine whether it meets the requirements of the state's wetlands regulations.

7. If the permit holder fails to submit the required plans or fails to comply with the requirements of the state's wetlands regulations, the DEP may deny or suspend the permit.

8. If the permit holder fails to submit the required plans or fails to comply with the requirements of the state's wetlands regulations, the DEP may deny or suspend the permit.

9. If the permit holder fails to submit the required plans or fails to comply with the requirements of the state's wetlands regulations, the DEP may deny or suspend the permit.

10. Recycling and Disposal of Materials

   - The field supervisor shall ensure that all construction materials are disposed of in accordance with state and local regulations. All construction materials, including but not limited to, concrete, asphalt, and other materials, shall be disposed of in accordance with state and local regulations.

   - The field supervisor shall ensure that all construction materials are disposed of in accordance with state and local regulations. All construction materials, including but not limited to, concrete, asphalt, and other materials, shall be disposed of in accordance with state and local regulations.

   - The field supervisor shall ensure that all construction materials are disposed of in accordance with state and local regulations. All construction materials, including but not limited to, concrete, asphalt, and other materials, shall be disposed of in accordance with state and local regulations.

11. Responsibilities for Fill Material

   - The fill material shall be placed in compliance with the requirements of the state's wetlands regulations. The fill material shall be placed in compliance with the requirements of the state's wetlands regulations. The fill material shall be placed in compliance with the requirements of the state's wetlands regulations.

   - The fill material shall be placed in compliance with the requirements of the state's wetlands regulations. The fill material shall be placed in compliance with the requirements of the state's wetlands regulations. The fill material shall be placed in compliance with the requirements of the state's wetlands regulations.

   - The fill material shall be placed in compliance with the requirements of the state's wetlands regulations. The fill material shall be placed in compliance with the requirements of the state's wetlands regulations. The fill material shall be placed in compliance with the requirements of the state's wetlands regulations.

12. Maintenance Program

   - The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts. The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts. The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts.

   - The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts. The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts. The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts.

   - The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts. The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts. The maintenance program shall be designed to ensure that the proposed activities do not result in any significant environmental impacts.

13. Completion of Submittal

   - The completion of the submittal is the final step in the process of obtaining a wetlands permit. The completion of the submittal is the final step in the process of obtaining a wetlands permit. The completion of the submittal is the final step in the process of obtaining a wetlands permit.

   - The completion of the submittal is the final step in the process of obtaining a wetlands permit. The completion of the submittal is the final step in the process of obtaining a wetlands permit. The completion of the submittal is the final step in the process of obtaining a wetlands permit.

   - The completion of the submittal is the final step in the process of obtaining a wetlands permit. The completion of the submittal is the final step in the process of obtaining a wetlands permit. The completion of the submittal is the final step in the process of obtaining a wetlands permit.
